DESCRIPTION

Palm LED Spike Light is Copper adjustable spike lights are a popular product in garden lighting installations. They can be used as a feature in multiple ways from garden/path up lighting, cross lighting and backlighting. The LED chips that are put into these fittings are just as important as the light itself and needs to be for the outdoor environment. As with all solid raw copper fittings, the finish when first installed will have a high gloss finish. This will fade very quickly to a patina finish similar to a bronze colour.
